FOR IMMEDIATE RELEASE

SOLID AND SQUARE

New from Turnstyle, no leather, no composite, no wood, no timber and no mix of materials or finishes... just a heavy duty, solid, square pair of door levers.

Made from 20mm solid brass square section, and set onto huge 260mm long square edged back plates, Turnstyle's new levers are no nonsense classics that will work well in both contemporary and classic settings.

Available in Satin Nickel, Bright Chrome and Polished Nickel with either the large back plate or a square rose (with square escutcheons to match).

The handles are available to view on Turnstyle's website but not in the current catalogue.
